Professional Overview:

Len Hutton has had over 30 years experience in the hydraulics and fire protection industry and in excess of 25 years as a designer and manager of hydraulics and fire protection design teams for various organisations.

In his last two positions covering some 24 years he has held the position of Associate within the management structure and headed the Hydraulics and Fire Protection departments of these two groups. During this period he successfully guided multi discipline team projects through from inception to completion. Additionally, he has provided advice in matters relating to Local Government, Land and Environment Court and Criminal and Civil issues.

Areas of Expertise:

- Bush fire risk and fuel load assessment
- Hydrocarbon fire protection and suppression systems
